ACTIVE TRANSPORTATION

1) Improve communication with and gather feedback from community orgs, constituents, social media, churches, surface orgs, schools, and ~~[illegible]~~ local news to inform of street safety projects updates quarterly.

↳ restrictive, change to as needed

- promote app on city social media; bakersfield non-emergency hotline

- info gap
- Blue Zone → org to connect w/

focus on
- 93306, 07, 04.03, 01, 05

- workshops @ high schools for advocacy & changemaking
- grants for students to research to cool down roads
- many students walk to school
- engage teachers & admin. to incorporate into lessons/promote city workshops
- hs students from each school to come together as congress to provide feedback on walk 2 school, street safety

- City is more proactive on updates
  ↳ we hear you! this is how we're incorporating your feedback...
- notifications from all depts. → better communication between depts.
  - city added crossing w/ really needed upgrades
  - city needs to educate public on what active transportation means

2) Identify streets that require safety improvements to increase signage, & shade, accessibility for students, people with disabilities, & seniors, and discourage fast driving.

- access to parks will encourage more active transportation
- need yields/better signage - ↳ of California to Chester
- create a corridor for active transpt through the grid

Want to see Complete streets in all areas
- reducing traffic lanes, bike lanes, more lighting

lighting maintenance needed on Bell Terrace St.

- speed bumps!
- expand to the east
- speed cameras & automatic ticketing
- may be loss of profit if parking is taken
- Blue Zone → promote active transp. through incentives/rest stops/shopping discounts

- bike lanes in SE Bk
- improve quality of life through access to biking/walking to ~~bikes~~ parks

TCC grant - strategic growth council

- active transportation corridor → 4th to MLK

increase crosswalks in SE & central Bk

- hard to see ~~street~~ lanes, painting maintenance

increase shade - bus stops are infrequent & ~~[illegible]~~ lots of students take long walks, also no sidewalks
- promote get bus to students (free for them)

- more crossing guards near schools are needed
- Liberty Pk to Liberty HS is dangerous bc not enough signage

- bus/rest stops w/ benches & shade
- City to identify funding for st. improvements ↳ Measure N

ACTIVE TRANSPORTATION

hot!

streets aren't big enough

Curb → green → sidewalk

split easement

Protect pedestrians

bike lanes off the street

SE/SW doesn't have sidewalks

service groups can reach out to contacts

Church alcohol Plan School & partner w/ schools

plant proper trees that don't push up sidewalks

parent assembly to disperse info
↳ w/ students

Community awareness

Plan to inform when main intersections will be done

promote on social media
↳ updates

Signage improvements
↳ around schools for those w/ hearing loss, seniors
more time for crosswalk

* engage + empower
* safety
* accessibility

* Seniors need access to information → orgs provide info, more likely to read, get churches involved

Colored signs → helps for distance from signs

lighting on sidewalks

need wheelchair acc. → N St., should be 4 way stop to California

- seniors need direct path across
- speed bumps
- addt'l parking to slow down

to improve traffic flow → 1 way streets
↳ seen in Fresno, Santa Clara County

collab. w/ school districts to protect students/ take care of safety

roundabouts to slow cars

uneven sidewalks throughout city

↳ # can call, reinforce through social media & app ↳ promote *Bk City → make simple

- A St. always backs up, cars sticking out, lights not working

↳ get younger pop. involved
- reach dif. demographics

AIR QUALITY

1. Create a community organization partnership focused on providing air filters and cooling mechanisms in low-income homes.
2. Reduce amount of vehicle miles traveled from non-renewable sources vehicles by providing incentives to businesses who promote alternative transportation for their employees.
3. Increase + protect urban greenery by ~~requiring~~ adopting urban greenery development standards.
4. Establish an innovation incubator fund to support new air quality improvement technology
5. Develop an air quality public notification system coupled with a public education campaign partnering with local high schools.

AIR QUALITY

City employees

5— repetitive of existing programs from Air District
BUT City could expand reach + identify new areas through community input

4— Money? Too vague. Who is doing it?
Add policies directing to find additional/federal funding
- Needs accountability mechanism

#1— funding?? Non-profits will not have $
- Missing truck traffic (focus on E & SE Bako)
- Missing buffer zones! - Need to replace swamp coolers
- Climate Action Plan - EJ focus updates/rehab for A/C units
- Need to call out equity #2- focus on City fleet + employees

Residents

#5- agree w/ partnering w/ schools, even more education!
Overall proactive + reduces cost
- Missing— Fund for testing for Valley fever either free or low cost, near ag + outskirts
- Need to appeal/attract medical providers who specialize
— #1- how will this be funded? Am I paying?
- agree w/ #3 #4- seems infeasible

Business Owners

AIR QUALITY

→ look @ what other cities are doing

→ agree w/ limiting vehicles and greenery

→ can increase access to business

→ ~~not not~~ feasibility issues w/ goods transportation routes

---

Student/Youth

- Focus more on monitoring, example local schools
- More focus on transit availability for students + walkability (Complete Streets)
- Like #1, would help students w/ asthma, expand to other tools such as bike rentals
- Like #3, #4 should partner w/schools
- Double schools as resiliency centers! City partnership

Water quality

1. Reduce runoff from ag + junk yards
2. Educate community on water contaments
3. Req water providers to meet/exceed requirements
4. Identify Municipal water (failing providers) providers to consolidate + annex
5. City-based Hotline ~~to~~ for community to report quality issues
6. Interim solutions for poor water qual — water bottle programs, etc.
7. Gray water systems + permeable surfaces
8. Use of bioswales
9. Updating homes/appliances to be more efficient

Source of pollution?

1. Student involvement in solutions, internships
   - hydroponics permaculture training
   - research projects
2. - Identify enforcing agency
   - Clarify reporting standards
   - response for emergencies
   - Consequences to water providers if req. not met
     - city mediate between state + water providers
   - State mandated consolidation
   - Maintain ~~eff~~ water sources (city controls)
3. - app to log issues, advertise on social media, news
   - employer-dispersed information for field workers
   - Provide info/link to quality dashboard
4. - Partner w/ school to distribute
   - & maintain + upgrade water fountains
   - evaluate school water quality. Solutions if impacted
5. - emergency cooking access, boiling water
   - Impact fees or fines that go to residents affected
   - Public filtered water filling stations - done in France (look at other countries)
   - reducing water consumption - landscaping req. for washes, soil additives
6. - downtown parking garages - more garages to minimize lots
   - Parking lots, removing parking standards
   - programs to create soil, awareness of benefits
   - more underground buildings
   - more green areas - parks, etc (find funding)

Water quality

Oil well capping and rehab system in partnership w/ State & County

Limiting development near ag & other Pollution-producing uses - buffers + LU
- no residential next to ag
- buffers between ag & res
- annex ag areas and Consider redev. options
- monitoring & testing continually

Water quality dashboard to show impacts & indicators

Vouchers for hotels, alternate places to shower etc if severely impacted

fire hydrants / water truck access

Partner with County to resolve issues in County jurisdiction

Protecting water sources by inlet testing.
Work w/ County & CalTrans
(cars run off road into reservoir)

- restricting residences
- Cleanup pollution, reducing
- monitoring & inspections
- Zoning buffer
- ~~Ag~~ water quality assessment for use transfer

- organize by water provider + geog. neighborhood, zip code
- report of violations & incidents
- Pie chart of contaminants & definitions impacts of contaminants

water quality

Monitoring + maintenance of hazmat.
Public reporting of leaks, concerns

Multilingual hotlines, education materials

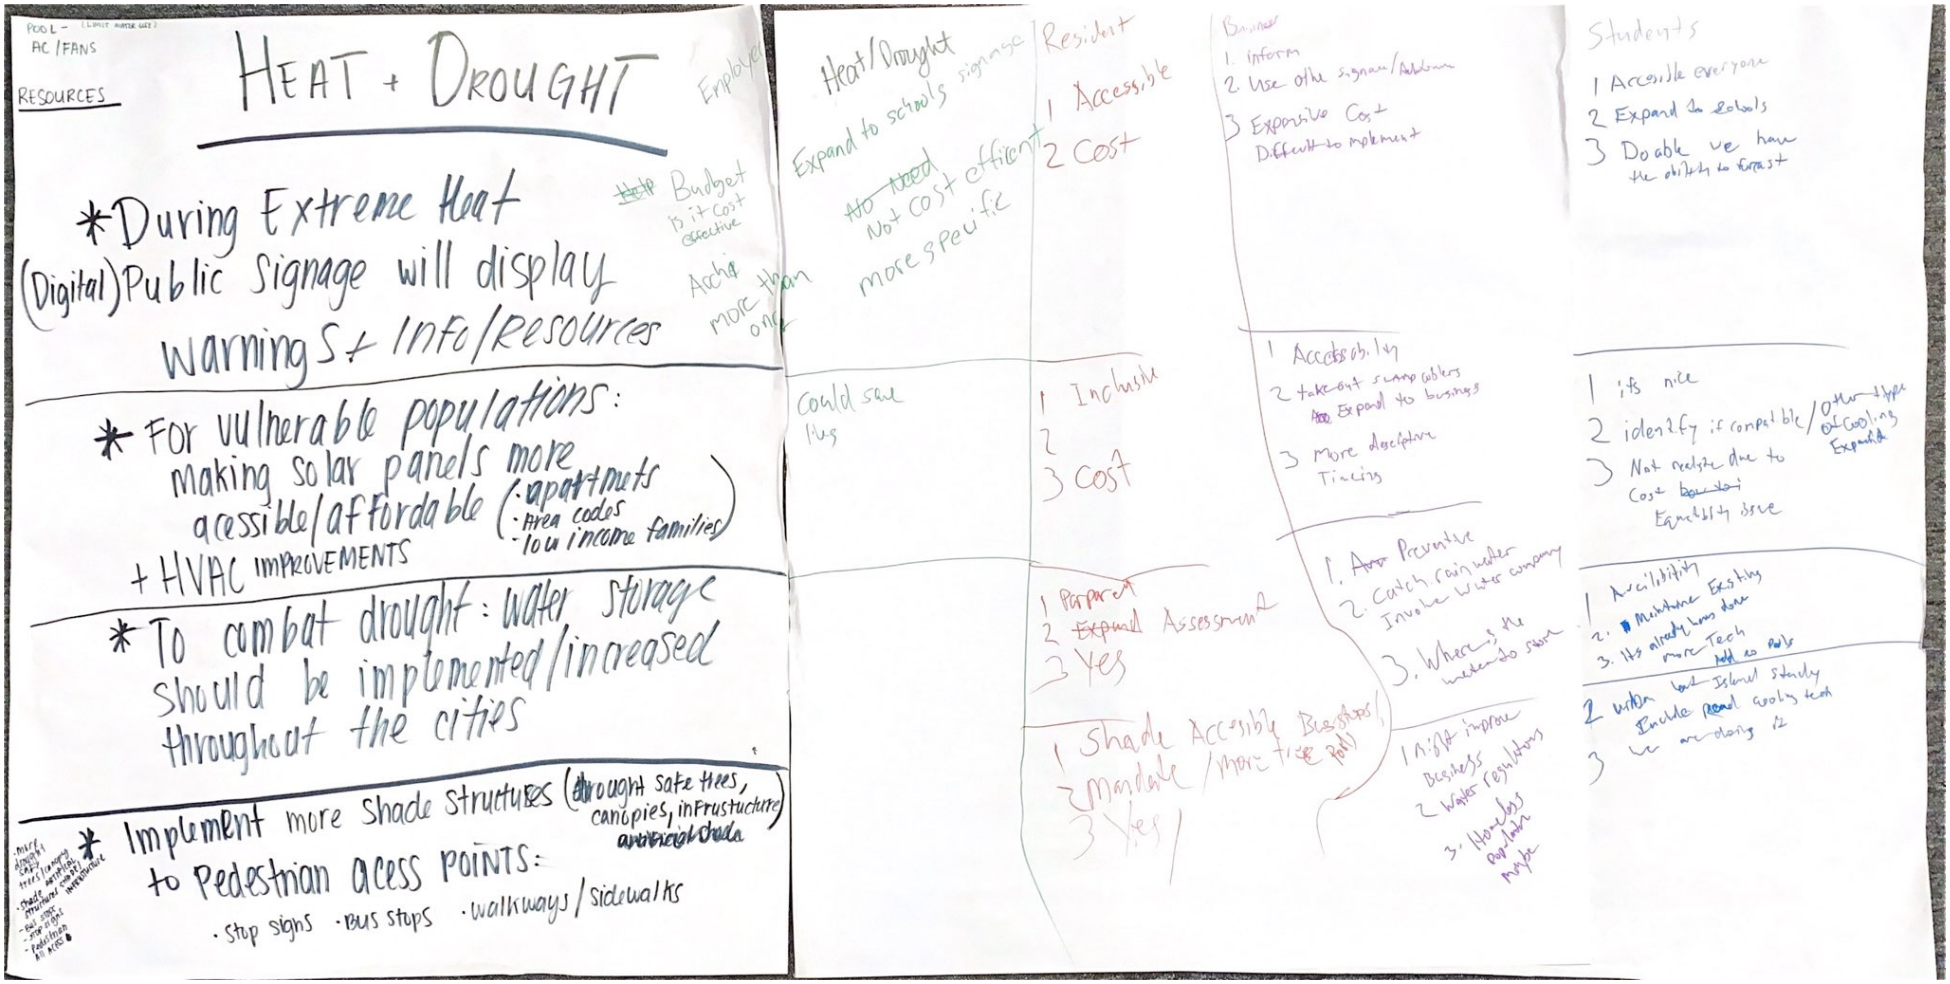
two month comment period
separate EJ element
heavy EJ engagement



POOL -
AC / FANS
RESOURCES
HEAT + DROUGHT
*During Extreme Heat (Digital) Public Signage will display warnings + Info/Resources
*For vulnerable populations: making solar panels more acessible/affordable (·apartments ·Area codes ·low income families)
+ HVAC IMPROVEMENTS
*To combat drought: water storage should be implemented/increased throughout the cities
*Implement more shade structures (drought safe trees, canopies, infrustucture) to Pedestrian acess points:
·Stop signs ·Bus stops ·walkways/sidewalks
